PRAKTIKUM 1 BASIS DATA

- 1. Buatlah database **akademik** di mysgl menggunakan command Prompt
- 2. Dengan menggunakan command prompt, pada database akademik, buatlah beberapa table dibawah ini:

a.table mahasiswa

```
MariaDB [(none)]> create database Akademik;
Query OK, 1 row affected (0.009 sec)
MariaDB [(none)]> use Akademik;
Database (hanged
MariaDB [Akademik]> Create table Mahasiswa(Nik char(10),nama varchar(50) not null,jk char( (1),tgl_lhr Date,jurusan var
Char(30), umur int,primary key(Nik));

ERROR 1064 (42000): You have an error in your SQL syntax; check the manual that corresponds to your MariaDB server versi on for the right syntax to use near '(1),tgl_lhr Date,jurusan varchar(30),umur int,primary key(Nik))' at line 1

MariaDB [Akademik]> Create table Mahasiswa(Nik char(10),nama varchar(50) not null,jk char (1),tgl_lhr Date,jurusan varchar(50)
har(30),umur int,primary key(Nik));
Query OK, 0 rows affected (0.035 sec)
MariaDB [Akademik]> desc mahasiswa;
                                         Null | Key | Default | Extra
   Field
                 Type
                   char(10)
                   varchar(50)
   nama
                   char(1)
   tgl_lhr
                   date
   jurusan
                   varchar(30)
                   int(11)
                                                              NULL
   rows in set (0.020 sec)
```

b.Table matakuliah

```
MariaDB [Akademik]> Create Table Matakuliah (kd_matakuliah char (10),Nm_mataKuliah varchar(30) not null,sks char(10),pri
mary key(kd_matakuliah));
Query OK, 0 rows affected (0.038 sec)
MariaDB [Akademik]> desc Matakuliah;
                   | Type
                                     | Null | Key | Default | Extra
  kd_matakuliah |
                      char(10)
                                                       NULL
                                      NO
                                               PRI
                      varchar(30)
                                      NO
  Nm mataKuliah
                                                       NULL
                                                       NULL
                     char(10)
  rows in set (0.022 sec)
```

c Table nilai

```
MariaDB [(none)]> use Akademik;
Database changed
MariaDB (Akademik) Create Table nilai(NPM char(16), kd_matakuliah char(10), Nilai_latihan int, Nilai_tugas int, Nilai_Kuis int, Nilai_Uts int, Nilai_Uas int;
ERROR 1064 (42000): You have an error in your SQL syntax; check the manual that corresponds to your MariaDB server version for the right syntax to use near '' at line 1
MariaDB [Akademik]> Create Table nilai(NPM char(16), kd_matakuliah char(10), Nilai_latihan int, Nilai_tugas int, Nilai_Kuis int, Nilai_Uts int, Nilai_Uas int);
Query OK, 0 rows affected (0.044 sec)

MariaDB [Akademik]> decs nilai;
ERROR 1064 (42000): You have an error in your SQL syntax; check the manual that corresponds to your MariaDB server version for the right syntax to use near 'decs nilai' at line 1
MariaDB [Akademik]> desc nilai;

Field | Type | Null | Key | Default | Extra |

NPM | char(16) | YES | NULL | |
| kd matakuliah | char(10) | YES | NULL | |
| Nilai_latihan | Int(11) | YES | NULL | |
| Nilai_tugas | int(11) | YES | NULL | |
| Nilai_tugs | int(11) | YES | NULL | |
| Nilai_tugs | int(11) | YES | NULL | |
| Nilai_us | int(11) | YES | NULL | |

| Nilai_us | int(11) | YES | NULL | |
| Nilai_us | int(11) | YES | NULL | |
| Nilai_us | int(11) | YES |
```

d.table prodi

```
!dariaDB [Akademik]> create Table Prodi(kd_prodi char(10),Nm_prodi varchar(30),Primary key(kd_prodi
Query OK, 0 rows affected (0.041 sec)
!ariaDB [Akademik]> desc prodi;
          | Type
 Field
                         Null | Key | Default | Extra |
 kd_prodi
            char(10)
                          NO
                                 PRI
                                       NULL
 Nm_prodi
            varchar(30)
                          YES
                                       NULL
 rows in set (0.037 sec)
```

Pada table Prodi tambahkan kolom Ketua Prodi dengan Type Data Varchar dengan maksimal karakter adalah 30

```
MariaDB [Akademik]> ALTER TABLE `prodi` ADD `ketua_prodi` VARCHAR(30) NOT NULL AFTER `Nm_prodi`;
Query OK, 0 rows affected (0.030 sec)
Records: 0 Duplicates: 0 Warnings: 0
MariaDB [Akademik]> desc prodi;
                             Null | Key | Default | Extra
 Field
               Type
 kd prodi
               char(10)
                             NO
                                     PRI
                                           NULL
 Nm_prodi
                varchar(30)
                              YES
                                           NULL
 ketua_prodi | varchar(30)
                                           NULL
                             NO
 rows in set (0.030 sec)
```

4. Pada table mahasiswa, tambahkan kolom alamat dengan Type Data Varchar dengan maksimal karakter adalah 60, diletakan setelah tanggal_lhr

```
ariaDB [Akademik]> ALTER TABLE `Mahasiswa` ADD `Alamat` VARCHAR(60) NOT NULL AFTER `tgl lhr`;
Query OK, 0 rows affected (0.028 sec)
Records: 0 Duplicates: 0 Warnings: 0
MariaDB [Akademik]> desc mahasiswa;
                          | Null | Key | Default | Extra |
 Field
           Type
 Nik
             char(10)
                            NO
                                    PRI
                                           NULL
 nama
             varchar(50)
                            NO
                                           NULL
             char(1)
  jk
                                           NULL
  tgl lhr
             date
                            YES
                                           NULL
 Alamat
             varchar(60)
                            NO
                                           NULL
             varchar(30)
  jurusan
                                           NULL
            int(11)
 umur
                            YES
                                           NULL
 rows in set (0.019 sec)
```

Pada Table nilai, ubah semua nama kolom yang memiliki kata nilai menjadi (kosong), contoh:
 Nilai_UAS menjadi UAS

```
MariaDB [Akademik]> ALTER TABLE `nilai` CHANGE `Nilai_latihan` `latihan` INT(11) NULL DEFAULT NULL;
Query OK, 0 rows affected (0.026 sec)
Records: 0 Duplicates: 0 Warnings: 0
MariaDB [Akademik]> ALTER TABLE `nilai` CHANGE `Nilai_Uts` `UTS` INT(11) NULL DEFAULT NULL;
Query OK, 0 rows affected (0.021 sec)
Records: 0 Duplicates: 0 Warnings: 0
MariaDB [Akademik]> ALTER TABLE `nilai` CHANGE `Nilai_Uas` `UAS` INT(11) NULL DEFAULT NULL;
Query OK, 0 rows affected (0.023 sec)
Records: 0 Duplicates: 0 Warnings: 0
MariaDB [Akademik]> ALTER TABLE `nilai` CHANGE `Nilai_kuis` `kuis` INT(11) NULL DEFAULT NULL;
Query OK, 0 rows affected (0.021 sec)
Records: 0 Duplicates: 0 Warnings: 0
MariaDB [Akademik]> desc nilai;
 Field
                                   | Null | Key | Default | Extra |
                    | Type

```

rows in set (0.019 sec)

V1 TUGAS PRAKTIKUM 2

- 1. Buatlah database universitas di mysql menggunakan command Prompt
- 2. Dengan menggunakan command prompt, pada database akademik, buatlah table dibawah ini:
 - a. Table mahasiswa

```
fariaDB [universitas]> USE universitas;
Database changed
ariaDB [universitas]> create table Mahasiswa(NIM char(12),Nama varchar(25),Alamat ا
varchar(50),Email char(15),Telephone char(15),primary key(NIM));
Query OK, 0 rows affected (0.015 sec)
(ariaDB [universitas]> show tables;
 Tables in universitas
 -----+
 mahasiswa
 row in set (0.001 sec)
!ariaDB [universitas]> desc mahasiswa;
                      | Null | Key | Default | Extra |
 Field
         Type
 NIM | char(12) | NO
Nama | varchar(25) | YES
Alamat | varchar(50) | YES
Email | char(15) | YES
                                  PRI
                                        NULL
                                          NULL
                                          NULL
                                          NULL
                           YES
 Telephone | char(15)
                                         NULL
 rows in set (0.009 sec)
```

B. tambahkan data

C . menambahkan data sesuai dengan nim

```
MariaDB [universitas]> INSERT INTO `mahasiswa
Query OK, 1 row affected (0.002 sec)
                                                                                                      'Agung suseno', 'Jakarta', 'agungsuseno0811@gmail.com', '082268711260')
MariaDB [universitas]> select*from mahasiswa;
                        Nama
                                            | Alamat | Email
                                                                                                      Telephone
                                                              lala@gmail.com
